In re application of:

Beatty *et al.*

Appl. No.: 10/706,484

Filed: November 12, 2003

For: **Endocardial Mapping System**

Confirmation No.: 7593

Art Unit: 3739

Examiner: Lee S. Cohen

Atty. Docket: 2384.002REI2

Information Disclosure Statement (Part II)

Mail Stop Amendment

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

Listed on accompanying IDS Forms are documents that may be considered material to the examination of this application, in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.56, 1.97 and 1.98.

Applicants have listed publication dates on the attached IDS Forms based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith.

This Information Disclosure Statement is being filed under 37 C.F.R. § 1.97(c) more than three months after the U.S. filing date and after the mailing date of the first Office Action on the merits, but before the mailing date of a Final Rejection, Notice of Allowance, or an action that otherwise closes prosecution in the application.

Copies of documents **NPL31-NPL72** are submitted.

It is expected that the examiner will review the prosecution and cited art in the parent application nos. 08/376,067, 07/950,448 and 07/949,690 in accordance with MPEP 2001.06(b), and indicate in the next communication from the office that the art cited in the earlier prosecution history has been reviewed in connection with the present application.

Applicants hereby inform the Examiner of current litigation involving a later-filed patent that claims priority to the patent for which reissue is currently sought. This disclosure is being made in accordance with MPEP 2001.06(c). The relevant litigation is *Biosense Webster, Inc. v. Endocardial Solutions, Inc.*, 04-8409-GHK (JWJx), C.D. Cal. A counterclaim involving U.S. Pat. No. 6,978,168, issued December 20, 2006, has been introduced into the litigation. U.S. Pat. No. 6,978,168 claims priority to U.S. Pat. No. 6,240,307, which is the subject of the instant reissue application. As they become available, Applicants will provide the Examiner with any documents from the litigation that are material to the patentability of the reissue application in accordance with *Critikon, Inc. v. Becton Dickinson Vascular Access, Inc.*, 120 F.3d 1253 (Fed. Cir. 1997).

It is respectfully requested that the Examiner initial and return a copy of the enclosed IDS Forms, and indicate in the official file wrapper of this patent application that the documents have been considered.

The U.S. Patent and Trademark Office is hereby authorized to charge any fee deficiency, or credit any overpayment, to our Deposit Account No. 19-0036.

Respectfully submitted,

STERNE, KESSLER, GOLDSTEIN & FOX P.L.L.C.
